EDUCATION

Florida State University - Tallahassee, FL
Bachelor of Science in Computer Science

December 2026
GPA: 3.64/4.0

PROFESSIONAL EXPERIENCE

ASRC Federal – Eglin AFB, FL

Starting June 2026

Cybersecurity / Systems Engineering Intern (Starting June 2026)

- Selected for the DoD TRMCI program, supporting mission-critical test and evaluation (T&E) environments through cybersecurity and systems engineering activities aligned with DoD risk management practices at the 96th Test Wing, Eglin AFB.

Florida State University Information Technology Services - Tallahassee, FL

January 2026 - Present

Infrastructure and Operations Intern

- Migrated SQL Server 2012 instances to 2022 via PowerShell automation scripts, authoring KB documentation adopted by the FSU ITS team and establishing a deployment-as-code pipeline across ~10 FSU College of Medicine production servers.
- Engineered a PowerShell orchestration script to sequentially deploy Dynatrace, CrowdStrike, ThreatLocker, and Location Mapping on new Azure VMs, reducing baseline build time to ~30 minutes with zero manual intervention.

Panasonic North America - Remote

May 2025 – Present

Cybersecurity Engineering & Architecture Intern

- Spearhead ISO 27001 and CMMC Level 2 audit readiness across 10+ business units, gathering 150+ control artifacts and improving compliance alignment with ISO, CMMC, and NIST frameworks.
- Design and deliver remediation reporting in Rapid7 InsightVM/CloudSec, enabling stakeholders to prioritize 50+ high-risk vulnerabilities and improving closure tracking accuracy by 30%.
- Lead CyberArk EPM/PAM cleanup across 2,000+ application events, assigning policies to support enterprise-wide removal of local privileged users in alignment with internal IT security policies.
- Improve IAM (Okta), EPM/PAM (CyberArk), and Cloud Security (Cloudflare WAF/CDN) platforms by authoring SOPs, collaborating with cross-functional teams, and leading feature testing to strengthen production security controls.

Valencia College - Orlando, FL

August 2023 – December 2023

Network Security Intern

- Built a virtualized enterprise security lab using pfSense and Security Onion to simulate attacks and monitor network traffic, improving malware detection accuracy by 80% and response speed by 95% through Splunk correlation.
- Conducted penetration testing with Kali Linux, Nmap, Nessus, and Metasploit to identify vulnerabilities and propose mitigations aligned with NIST and OWASP standards.

PROJECTS

Mission-System Security Architecture Simulator

January 2026 - Present

- Built a full-stack mission security simulator (Next.js, FastAPI, NetworkX, PostgreSQL) to model cyberattack propagation across distributed DoD-relevant architectures, generating mission impact scores and mitigation recommendations — deployed live on Vercel/Render.

Security Automation Pipeline

October 2025

- Built a CI/CD security pipeline in GitHub Actions integrating Bandit, Trivy, and Gitleaks to automate SAST, dependency, and secret scanning, improving vulnerability visibility and aligning with OWASP/CIS standards.

White-hat Penetration Test

July 2024

- Exploited 6 critical vulnerabilities using Nmap, Nessus, Metasploit to gain Domain Admin access, then authored a 50-page remediation report reducing attack surface by 90%.

LEADERSHIP & INVOLVEMENT

The ColorStack Chapter at FSU – Tallahassee, FL

May 2025 – Present

Treasurer & Co-Founder

- Co-founded FSU's ColorStack chapter, grew membership to 50+ students in the first semester, and fostered an inclusive community for underrepresented students in tech.
- Manage chapter finances and operations by maintaining budgets, submitting SGA funding requests, and leading a seven-member executive board to deliver professional development and mentorship events.

FSU Semi-Annual CTF Competition – Tallahassee, FL

November 2025

- Placed 5th among undergraduate competitors in FSU's CS department CTF, applying skills in web exploitation, digital forensics, crypto, binary exploitation and reverse engineering under timed challenge conditions.

TECHNICAL SKILLS

Cybersecurity: NIST RMF, ISO 27001, CMMC, Vulnerability Management, Risk Assessment, IAM, PAM, Cloud Security, Threat Modeling, MITRE ATT&CK

Security Tools: Okta, CyberArk, Rapid7, Cloudflare, Splunk, Metasploit, Nmap, Nessus, ThreatLocker, Kali Linux

Systems & Infrastructure: Windows, Linux/Unix, Virtualization (Hyper-V, VMware), Azure, AWS, Docker, Dynatrace

Programming & Automation: Python, PowerShell, Bash, C++, SQL, Git/GitHub

Certifications: CompTIA Security+ SY0-701, AWS Certified Cloud Practitioner CLF-C02, Google Cybersecurity Certificate (In progress)
