

Sebastian Velazquez

sebastianjvelazquez@gmail.com | sjvelazquez.com | Orlando, FL | U.S. Citizen | Active Interim Secret Security Clearance

EDUCATION

Florida State University - Tallahassee, FL

December 2026

Bachelor of Science in Computer Science

GPA: 3.71/4.0

Honors: President's List, Dean's List

PROFESSIONAL EXPERIENCE

Raytheon, an RTX Business – Remote

August 2026 - Present

Software Platform Engineer Co-op

ASRC Federal - Eglin AFB, FL

May 2026 – August 2026

Cybersecurity Systems Engineering Intern | Supporting 96th Test Wing, 96 RANSS

- Engineered an end-to-end embedded command-and-control system in C++ and Qt/QML with SDK-based hardware drivers and CoAP communication, validating functionality through Hardware-in-the-Loop (HIL) bench testing.
- Developed a standardized Cybersecurity Requirements Gathering Form aligned to NIST SP 800-37 Rev 2 (RMF) and SP 800-53 Rev 5, establishing a repeatable, audit-ready intake process for mission systems pursuing Authorization to Operate (ATO).
- Spearheaded a Software Assurance Risk Assessment (SARA) for mission-critical flight-test telemetry software, analyzing network footprints (Ports, Protocols, and Services) and implementing DISA STIG controls to secure system boundaries.

Florida State University Information Technology Services - Tallahassee, FL

January 2026 – May 2026; August 2026 – Present

Infrastructure and Operations Intern

- Migrated SQL Server 2012 instances to 2022 via PowerShell automation scripts, authored KB documentation adopted by the FSU ITS team, and established a deployment-as-code pipeline across ~10 FSU College of Medicine production servers.
- Engineered a PowerShell orchestration script to sequentially deploy Dynatrace, CrowdStrike, ThreatLocker, and Location Mapping on new Azure VMs, reducing baseline build time to ~30 minutes with zero manual intervention.

Panasonic North America - Remote

May 2025 – May 2026

Cybersecurity Engineering & Architecture Intern

- Spearhead ISO 27001 and CMMC Level 2 audit readiness across 10+ business units, gathering 150+ control artifacts and improving compliance alignment with ISO, CMMC, and NIST frameworks.
- Design and deliver remediation reporting in Rapid7 InsightVM/CloudSec, enabling stakeholders to prioritize 50+ high-risk vulnerabilities and improving closure tracking accuracy by 30%.
- Lead CyberArk EPM/PAM cleanup across 2,000+ application events, assigning policies to support enterprise-wide removal of local privileged users in alignment with internal IT security policies.

Valencia College - Orlando, FL

August 2023 – December 2023

Network Security Intern

- Built a virtualized enterprise security lab using pfSense and Security Onion to simulate attacks and monitor network traffic, improving malware detection accuracy by 80% and response speed by 95% through Splunk correlation.
- Conducted penetration testing with Kali Linux, Nmap, Nessus, and Metasploit to identify vulnerabilities and propose mitigations aligned with NIST and OWASP standards.

PROJECTS

AI-Powered Security Log Triage Engine

February 2026 – Present

- Built a Python-based security triage engine that parses logs, applies rule-based detection, maps alerts to MITRE ATT&CK, and uses LLM-assisted analysis to generate analyst-ready incident summaries.

Mission-System Security Architecture Simulator

January 2026 – May 2026

- Built a full-stack mission security simulator (Next.js, FastAPI, NetworkX, PostgreSQL) to model cyberattack propagation across distributed DoD-relevant architectures, generating mission impact scores and mitigation recommendations.

Security Automation Pipeline

October 2025

- Built a CI/CD security pipeline in GitHub Actions, integrating Bandit, Trivy, and Gitleaks to automate SAST, dependency, and secret scanning, improving vulnerability visibility and aligning with OWASP/CIS standards.

LEADERSHIP & INVOLVEMENT

The ColorStack Chapter at FSU - Tallahassee, FL

May 2025 – Present

Treasurer & Co-Founder

- Co-founded FSU's ColorStack chapter, grew membership to 50+ students in the first year, and manage budgets, SGA funding requests, and operations with a seven-member executive board.

TECHNICAL SKILLS

Cybersecurity: NIST RMF, NIST SP 800-53, DISA STIGs, SCAP, ISO 27001, CMMC, Software Assurance (SARA), Vulnerability Management, Risk Assessment, IAM, PAM, Cloud Security, Threat Modeling, MITRE ATT&CK, ATO

Security Tools: Okta, CyberArk, Rapid7, Cloudflare, Splunk, Metasploit, Nmap, Nessus, ThreatLocker, Kali Linux, eMASS

Systems & Infrastructure: Windows, Linux, Hyper-V, VMware, Azure, AWS, Docker, Dynatrace, Embedded Systems, HIL Testing

Programming, Automation & AI: Python, PowerShell, Bash, C++, SQL, Git/GitHub, CI/CD, Qt/QML, CoAP, LLM-assisted analysis

Certifications: CompTIA Security+ SY0-701, AWS Certified Cloud Practitioner CLF-C02
