EDUCATION

Florida State University - Tallahassee, FL

December 2026

Bachelor of Science in Computer Science

GPA: 3.64/4.0

Valencia College - Orlando, FL

December 2024

Associate of Science in Cybersecurity & Network Engineering

Associate of Arts in Computer Science

PROFESSIONAL EXPERIENCE

Florida State University Information Technology Services - Tallahassee, FL

January 2026 - Present

Infrastructure and Operations Intern

- Migrated two legacy SQL Server 2012 instances to SQL Server 2022 by developing and debugging PowerShell baseline automation scripts, reducing manual deployment steps across ~10 FSU College of Medicine production servers.
- Provisioned and validated a production-ready Azure VM by executing security, software, and SQL baseline configurations, resulting in a repeatable deployment-as-code pipeline documented in SOPs adopted by the FSU ITS team.

Panasonic North America - Remote

May 2025 – Present

Cybersecurity Engineering & Architecture Intern

- Spearhead ISO 27001 and CMMC Level 2 audit readiness across 10+ business units, gathering 150+ control artifacts and improving compliance alignment with ISO, CMMC, and NIST frameworks.
- Design and deliver remediation reporting in Rapid7 InsightVM/CloudSec, enabling stakeholders to prioritize 50+ high-risk vulnerabilities and improving closure tracking accuracy by 30%.
- Lead CyberArk EPM/PAM cleanup, analyzing 1,500+ application events and assigning policies to support enterprise-wide removal of local privileged users and strengthen endpoint security.
- Improve IAM (Okta), EPM/PAM (CyberArk), and Cloud Security (Cloudflare WAF/CDN) platforms by authoring SOPs, collaborating with cross-functional teams, and leading feature testing to strengthen production security controls.

Valencia College - Orlando, FL

August 2023 – December 2023

Network Security Intern

- Built a virtualized enterprise security lab using pfSense and Security Onion to simulate attacks and monitor network traffic, improving malware detection accuracy by 80% and response speed by 95% through Splunk correlation.
- Conducted penetration testing with Kali Linux, Nmap, Nessus, and Metasploit to identify vulnerabilities and propose mitigations aligned with NIST and OWASP standards.

PROJECTS

Secure Satellite Ground Station

January 2026

- Applied basic MBSE principles to model a secure satellite ground station, defining system context, functional and security requirements, high-level architecture, and mission behavior.

Security Automation Pipeline

October 2025

- Built a CI/CD security pipeline in GitHub Actions integrating Bandit, Trivy, and Gitleaks to automate SAST, dependency, and secret scanning, improving vulnerability visibility and aligning with OWASP/CIS standards.

Blue Team Defense for Galaxy.quest Infrastructure

July 2024

- Hardened 5+ Windows servers through patching, password enforcement, VLAN segmentation, and Cisco firmware updates, achieving 100% patch compliance and reducing attack surface by 70%.

LEADERSHIP & INVOLVEMENT

The ColorStack Chapter at FSU – Tallahassee, FL

May 2025 – Present

Treasurer & Co-Founder

- Co-founded FSU's ColorStack chapter, grew membership to 40+ students in the first semester, and fostered an inclusive community for underrepresented students in tech.
- Manage chapter finances and operations by maintaining budgets, submitting SGA funding requests, and leading a seven-member executive board to deliver professional development and mentorship events.

FSU Cybersecurity Club – Tallahassee, FL

May 2025 – Present

Member

- Participate in CTFs, blue team labs, and technical workshops focused on secure systems and cyber defense.

FAMU/FSU Society of Hispanic Professional Engineers (SHPE) Chapter– Tallahassee, FL

August 2025 – Present

Member

TECHNICAL SKILLS

Cybersecurity: NIST RMF, ISO 27001, CMMC, Vulnerability Management, Risk Assessment, IAM, PAM, Cloud Security

Security Tools: Okta, CyberArk, Rapid7 InsightVM/CloudSec, Cloudflare, Splunk

Systems & Infrastructure: Windows, Linux/Unix, Virtualization (Hyper-V, VMware), Azure, AWS

Programming & Automation: Python, PowerShell, Bash, C++, SQL, Git/GitHub

Certifications: CompTIA Security+ SY0-701, AWS Certified Cloud Practitioner CLF-C02, Google Cybersecurity Certificate (In progress)
